SUMMARY

Graduating senior at UC San Diego double majoring in Cognitive Science (Language & Culture) and Interdisciplinary Computing & the Arts (GPA 3.895, Provost Honors). Experience spanning EEG research, real-time data visualization, UX fieldwork, and interactive installation. Interested in roles combining research, prototyping, and technical execution across human perception, computational media, and interactive systems.

EDUCATION

University of California, San Diego

B.S. Cognitive Science (Language & Culture) · B.A. Interdisciplinary Computing & the Arts · Expected June 2026

GPA: 3.895 · Provost Honors

Santa Monica College

A.S. Computer Science · GPA: 4.0 · Dean's List

RESEARCH EXPERIENCE

Research Assistant — Auditory Cognition Lab

UC San Diego · 2025–2026

- Supported research investigating how people recognize and describe everyday sounds using binaural (HRTF-preserving) recordings.
- Helped design experiment workflows and conducted participant data collection sessions.
- Analyzed confidence-versus-accuracy patterns in free-response labeling to examine gaps between perception and interpretation.

SELECTED PROJECTS

Tide Ink — Live Tidal Data Visualization

VIS 141B · 2025

- Built a Python + MPI4py visualization pipeline rendering live NOAA tidal data across a 20-screen wall installation using 20 parallel processes.
- Developed particle-based rendering system in Pygame where tide height dynamically controlled flow speed, color, and motion frequency in real time.
- Designed global coordinate synchronization across displays so the wall functioned as one continuous visual system.

Linguistic Interference — EEG Cognitive Load Study

COGS 189 · 2026

- Built EEG analysis workflow in Python/MNE for a 64-channel, 18-participant study examining how comprehensible vs. foreign lyrics affect cognitive load.
- Processed frontal beta and parietal alpha band activity; evaluated condition differences using rmANOVA and LOSO cross-validation.
- Investigated limitations of generalized bandpower features for modeling linguistic interference across participants.

Decision Paralysis on Streaming Platforms — UX Field Study

COGS 13 · 2025

- Conducted 20 naturalistic observation sessions examining navigation behavior and decision-making patterns on streaming platforms.
- Designed behavioral coding framework for navigation strategy, selection latency, and satisfaction patterns.
- Identified circular navigation as a recurring indicator of choice overload; groups averaged 14.7 min vs. 6.3 min for solo viewers.

Sediments of Memory — Interactive Installation

VIS 110A · 2026 · Mandeville Gallery, UCSD

- Built Arduino-controlled installation translating hand-crank motion into sequential LED illumination across 20 light zones.
- Integrated lighting behavior, material filtering, and embodied interaction into a gallery-scale installation.

PROFESSIONAL EXPERIENCE

Shift Manager

Khawaiian · Los Angeles, CA

- Coordinated daily operations during high-volume shifts; trained new team members and resolved real-time workflow issues.

English Tutor

Vision Academy · South Korea

- Taught English to anxious students; adjusted explanations to each student's comfort level, prioritizing comprehension over memorization.

VOLUNTEER

San Diego Habitat for Humanity · San Diego, CA · Ongoing

Lions Tigers & Bears · Alpine, CA · Ongoing

SKILLS

Programming: Python, Java, C++, SQL

Libraries & Tools: MPI4py, Pandas, scikit-learn, MNE, Pygame, TouchDesigner, Arduino

Research: EEG signal processing, behavioral observation, UX fieldwork, experimental design, qualitative analysis

Languages: Korean (Native), English (Native), French (Professional — DELF B2)
